

June 2020

Category review: Chips

Retail Analytics

Classification: Confidential

Our 17 year history assures best practice in privacy, security and the ethical use of data

We all have a responsibility to use data for good

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantum has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

Quantum believes in using data for progress, with great care and responsibility. As such please respect the commercial in confidence nature of this document.

Executive summary

01

Task 1

Analyzed the Chips category to understand overall sales performance, customer purchasing behaviour, and key customer segments. Identified the customer groups contributing the highest sales and examined the impact of life stage and premium customer segments on purchasing patterns. These insights help identify the most valuable customer segments for future marketing and business strategies.

02

Task 2

Evaluated the effectiveness of the in-store trial by selecting suitable control stores and comparing their performance with the trial stores. The analysis measured changes in sales, customer numbers, and transaction behaviour during the trial period. Results showed that **Store 77 (Trial)** delivered the strongest positive impact, while **Store 86 (Trial)** showed moderate improvement and **Store 88 (Trial)** demonstrated limited impact.

01

Category

Category Overview:

The chips category demonstrated stable sales throughout the year, with only a temporary decline in February 2019.

Key Insights:

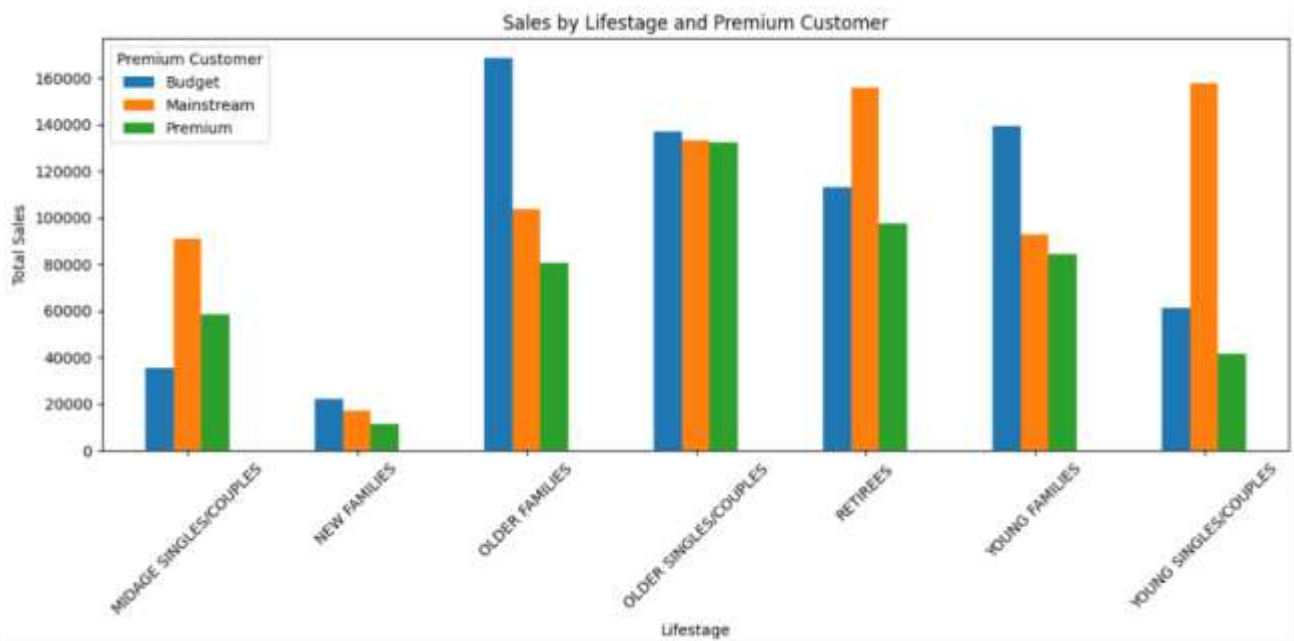

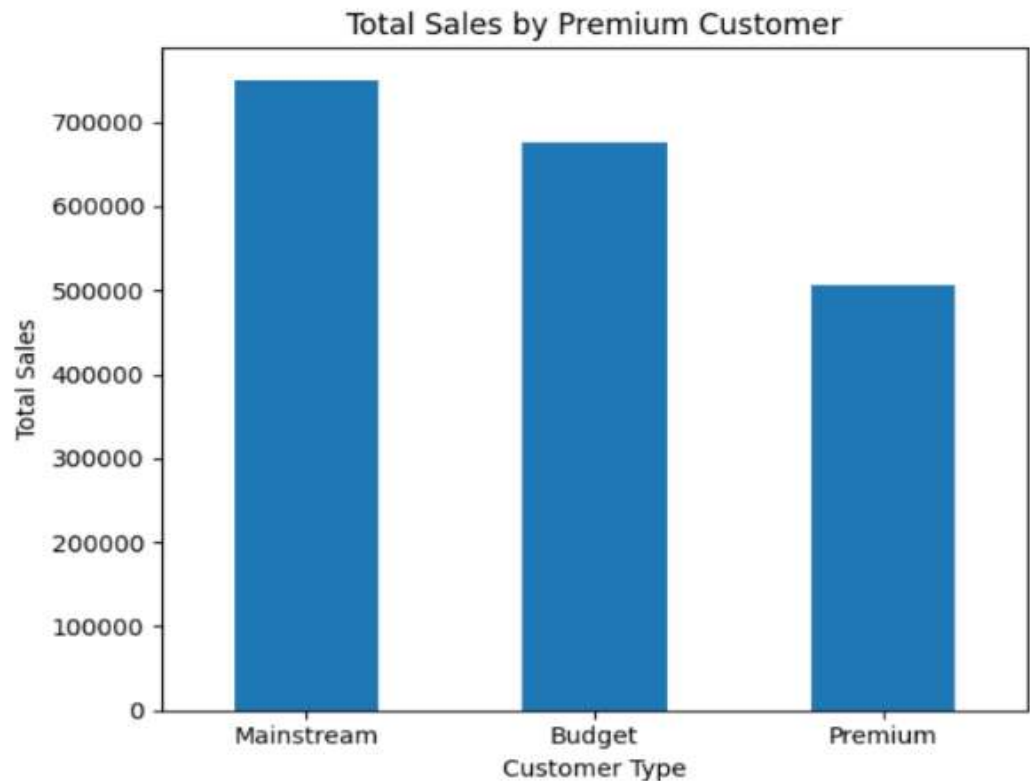

- Monthly chip sales remained relatively stable throughout the analysis period, indicating consistent customer demand.
- Category sales peaked in **December 2018**, while a temporary sales dip was observed in **February 2019**, before recovering in **March 2019**.
- The overall sales trend suggests short-term seasonal fluctuations rather than a sustained decline in category performance.

Mainstream customers consistently generate the highest chip sales across most customer groups.

Mainstream customers contributed the highest overall chip sales across all affluence segments

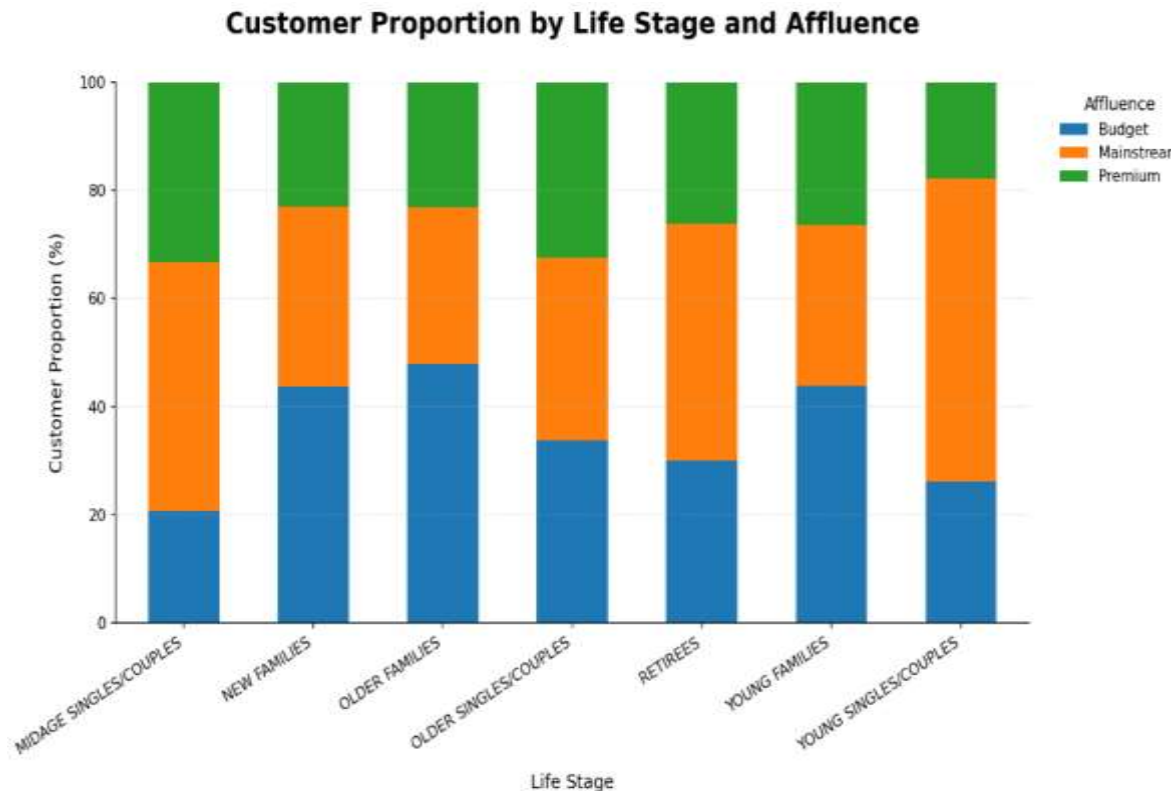

Purchasing behaviour varies across life stages, with different affluence segments contributing more strongly depending on the customer group

Older Families and Young Families generated strong sales across affluence segments, highlighting them as important customer groups for the chips category

Customer Composition by Life Stage and Affluence

Customer composition differs across life stages, highlighting distinct Budget and Mainstream customer segments.

Key Insights:

Mainstream customers dominate Young Singles/Couples, Midage Singles/Couples and Retirees.

Budget customers represent the largest proportion in New, Young and Older Families.

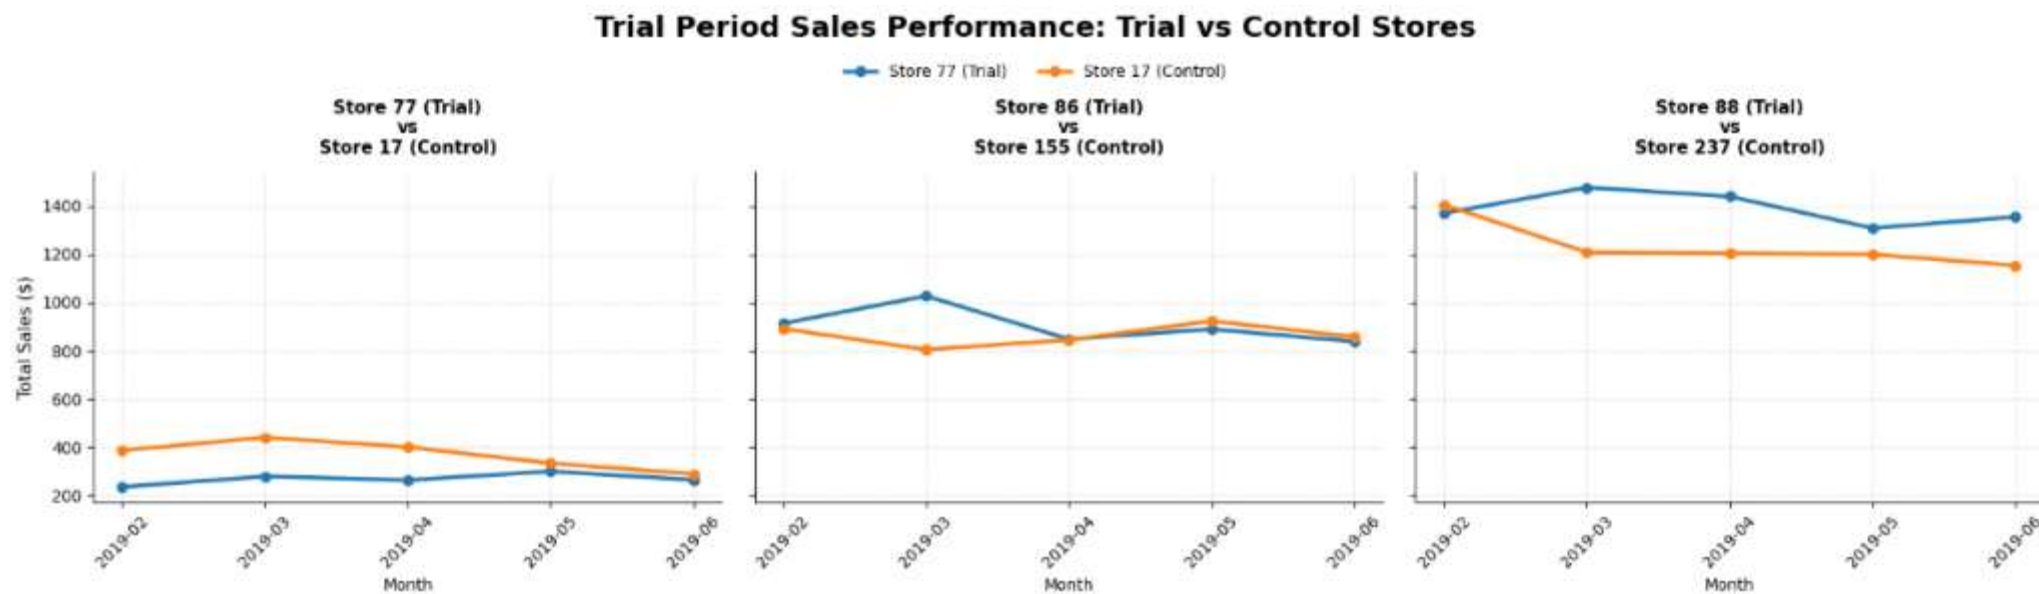

Older Singles/Couples are almost evenly distributed across Budget, Mainstream and Premium segments

02

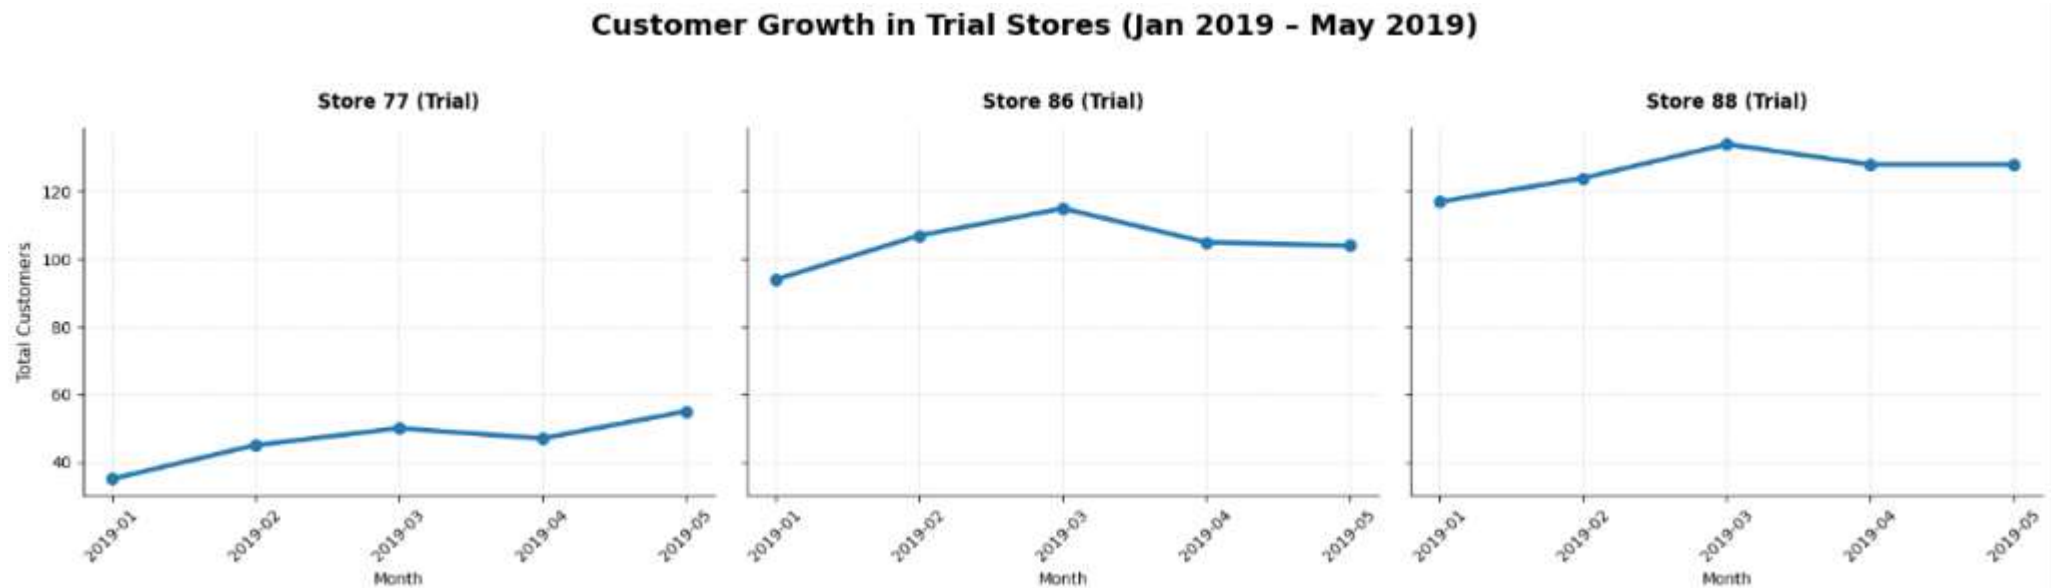

Trial store performance

Trial Sales Comparison

(February 2019 – June 2019)

Call out of the performance in the trial store, determining if it was successful
